

PROMOTING ROAD **SAFETY &** **MAINTAINING INDEPENDENCE**

We all know that driving is an important activity for most adults and that being able to drive helps to maintain personal freedom, quality of life and independence. We also know that driving is a complex task and a high risk activity, where the consequences of driving unsafely can be catastrophic for the driver, their passengers and other road users. DARS was established by Nick Neville, a local Occupational Therapist who has completed post graduate training in driver assessment. Nick is also a licenced Driving Instructor.

DARS specialises in assisting clients who have suffered from any loss of ability as result of ageing, illness or injury. The service works with clients between the ages of 16 to 100+ years old and their families.

DARS has assisted clients who have age related conditions, brain injury, dementia, autism spectrum disorders, spinal cord injury, vision deficits, neurological injury (strokes, MS, Parkinson's Disease), amputees and clients with mental health conditions.

Our goal, is to provide each client with an independent, objective opinion on their fitness to drive and to provide advice on how to maintain their licence.

Clients or immediate family members can arrange a referral to DARS or a referral can be organised by their Doctor. Please contact DARS for more information.
